PROFESSIONAL SUMMARY

Frontend Developer specializing in React and TypeScript applications with real-time data (WebSockets) and animation-driven interfaces (GSAP, Framer Motion, Three.js). Experienced in converting UI/UX designs into reusable, production-ready components, integrating REST APIs, and optimizing performance through code-splitting, caching, and lazy loading. Seeking to contribute to a frontend team and grow as a product engineer.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, C, C++
Frameworks & Libraries:	React.js, Redux Toolkit, React Query, Tailwind CSS, Styled Components, Vue 3, GSAP, Framer Motion, Three.js
Tools:	Git, GitHub, Vite, Webpack, Vercel, CI/CD
APIs & Real-Time:	REST APIs, WebSockets, React Query
Other:	Responsive & Cross-Browser Design, Design-to-Code, Performance Optimization, Integration Testing, DSA (C++), AI Tools

PROJECTS

E-Commerce Frontend with Cart & Payment Integration | React, Redux Toolkit, React Query, Razorpay | Aug 2026

- Built a responsive e-commerce site with product listings, search/filter, wishlist, cart management, and Razorpay payment gateway integration.
- Implemented infinite scroll, skeleton loaders, and optimistic UI updates; used React Query caching to cut redundant API calls and keep the UI responsive under frequent state changes.

GitHub: github.com/Gautam-K03

AI-Powered SaaS Analytics Dashboard | React, TypeScript, Tailwind CSS, Recharts, WebSockets | Aug 2026

- Built a full-featured SaaS dashboard with dynamic charts, real-time WebSocket updates, and a responsive multi-layout UI following Atomic Design principles.
- Implemented JWT authentication, role-based access control (RBAC), and dark/light mode using a reusable component library.
- Improved load performance through route-based code-splitting and lazy loading; added integration tests to catch regressions before release.

Personal Developer Portfolio | Vue 3, GSAP, Lenis, TypeScript | 2026

- Built a single-page portfolio with continuous scrolling, background color tweens, and a live signal line that reacts to pointer and scroll position.
- Used GSAP ScrollTrigger/SplitText and Lenis smooth scroll with Vue 3 composables; deployed on GitHub Pages and Vercel.

EXPERIENCE & SIMULATIONS

Front-End Developer Simulation — Skyscanner (via Forage)

May 2025

- Converted UI/UX designs into a responsive React app using Skyscanner's Backpack design system and calendar date selector.
- Configured Backpack UI components, customized SCSS, and implemented a multi-step Continue button flow; tested across browsers for consistency.
- Gained practical exposure to CI/CD pipelines, front-end architecture decisions, and agile team workflows.

EDUCATION

B.Tech in Computer Science Engineering | St. Andrews Institute of Technology and Management, Gurgaon (MDU Rohtak) | 2022–2026

Diploma in Electronics and Communication Engineering | PUSA Institute of Technology | 2019–2022

CERTIFICATIONS

JavaScript Course • Crash Course on Python — Google • Database Management Systems (DBMS) Course • Technical Support Fundamentals — Google
